EXPERIENCE

Unity Game Developer

Efuye-Gela Company

Jan. 2025 - Present

- Developed and launched A game called Idicoli which i really took experience and knowledge from it which opened my sight on web based games that we can integrate in to telegram .
- Collaborated with cross-functional teams to design game mechanics and level structures which enabled as to get 11th place and 2nd place in competitions .
- Implemented the same systems to achieve a telegram integrated games which then i developed games called hover-glide, balloon-popper , meteor dash and others
- cloned multiple game logics to enhance my skills like for instance Floopy-bird, angry-bird , slitherio,car racing games,
- platforms:- Windows , Android phone, Webgl

Full-Stack Developer

meedish Tech Solutions

Jan. 2025 - Present

- Developed A platform called YETAL-SEARCH which is in the early stages. it is a website for searching and finding imported products and it is responsive web applications, improving client satisfaction by 30%.
- Integrated third-party APIs to enhance functionality and user experience.
- Streamlined development processes through agile methodologies, reducing project timelines significantly.

Globite & meedish companys collaboration

Jan. 2025 - Present

- Developed A platform called SNS-International Market which is a supermarket webapp that i developed working beside my collegous .SNS is a website that displays if a product it in stock and update customers about prices and such.

Ferenjie clinic

Jan. 2025 - Present

- This is Hospital management system that we made in team to a private client this is a multi feature ,scalable system that supports multiple concurrent users efficiently ,we have spent more time on this but the final result satisfied the customers and got recommendations from it too.
